The Neural Basis of Thought and Language

- The goal here is to build a cognitive plausible model of language learning
- A very different game that one could play is unsupervised / semi-supervised language learning using shallow or no semantics - statistical NLP - automatic extraction of syntactic structure

Language and thought - langcoglab

language plays a causally fundamental role in creating categories of thought, and in organizing and channeling thought that is already mentally present In general, both logic and currently available evidence suggest a disclamatory view of strongest proposals (eg, Benjamin Whorf, 1956) according to ...

General Education Tier One

LING 150A1 - Language in the World All human communities have language - and our language is central to our lives We use language not only to communicate with each other, we use to in our dreams, in our art, and some have even argued that language is the stuff of thought itself

language influence the way I think?

that our language has forced a certain view of time on us; it could also be that our view of time is reflected in our language, or that the way we deal with time in our culture is reflected in both our language and our thoughts It seems likely that language, thought, and culture form three strands of a braid, with each one affecting the others

Does science make belief in God obsolete?

Language Instinct, How the Mind Works, The Blank Slate, and most recently, The Stuff of Thought: Language as a Window into Human Nature STEVEN PINKER A TEMPLETON CONVERSATION 3 This leaves morality itself—the benchmarks that allow us to criticize and improve our moral intuitions

The Contemporary Theory of Metaphor George Lakoff

classical theories of language, metaphor was seen as a matter of language not thought Metaphorical expressions were assumed to be mutually exclusive with the realm of ordinary everyday language: everyday language had no metaphor, and metaphor used mechanisms outside the realm of everyday conventional language The classical theory
