### [Socio Demographic Factors Affecting Infant](#)

Background Antenatal care (ANC) is a key strategy to improve maternal and infant health. However, survey data from sub-Saharan Africa indicate that women often only initiate ANC after the first trimester and do not achieve the recommended number of ANC visits. Drawing on qualitative data, this article comparatively explores the factors that influence ANC attendance across four sub-Saharan ...

The anatomy and physiology of an infant or a child differ from an adult's in many ways other than height and weight, and clinical interventions must be applied with these factors in mind. Children have less pulmonary reserve than an adult and have a proportionally higher oxygen requirement. They can maintain central organ perfusion during a period of significant fluid loss because of powerful ...

There are also important socio-cultural factors at play such as the intergenerational transmission of poverty and deprivation (Martorell & Zongrone 2012). Substantial improvements in linear growth can be achieved through child adoption and migration and following rapid economic and social development. Despite clearly documented intergenerational effects, it would seem that nearly normal ...
